USA Learns

Pedagogical Assumptions

- Language learning needs to focus on listening, reading, speaking and writing
- Instructional content should be reflective of social and linguistic contexts
- Language acquisition occurs through meaningful use and interaction with the language

ESL Techniques Applied

1. Comprehensible Input and Early Production

Language supported by visuals to make meaning clear.

Activities only require one or two-word responses at early stages.

2. Focused Listening

Helps learners build linguistic awareness and become better listeners.

3. Life Skills Reading

Classified ads, application forms, flyers to practice extracting pertinent information.

ESL Techniques Applied

4. Problem Solving

Develop critical thinking skills and communicative competence.

5. Scaffolding

To aid construction of meaning.

Vocabulary development, readings, prediction and listening activities build background knowledge to aid comprehension of video dialog.

Each lesson builds upon the other but can be taken in random order.

"As an ESL teacher, I LOVE this app because I now can tell my English language learners that with this mobile version they can easily practice and improve their English. I particularly like the way a learner can record the word and hear it back. Finally an app that includes listening and speaking practice for intermediate and beginning learners, too!"
