

California Adult Education Program Governance Survey Results June 3-June 21, 2019

Survey background

In 2018, the Los Angeles Regional Adult Education Consortium conducted a governance survey that focused on a sampling of the state's 71 adult education consortia. This research inspired the California Adult Education Program to find out what the statewide governance picture looked like to create a resource for consortia considering changes to their governance structure. The intent is that the information in this report, and the individual-response file that accompanies it, will serve as a valuable, time-saving resource to help you more quickly identify and connect with consortia that can best provide guidance and wisdom applicable to your situation. In addition, the information shared via the survey will help the California Adult Education Program with the process of reviewing consortium bylaws for adult education consortia throughout the state to ensure compliance with state requirements.

The Survey

CAEP Governance Structure Survey

California Adult Education Program Consortium Governance Structure Survey

The CAEP Office would like to learn more about how the 71 regional consortia have set up their governance structure. The Los Angeles Regional Adult Education Consortium conducted an in-depth study of 10 regions' governance structures. We developed this survey in response to feedback from their presentation at CCAE from consortia wanting to learn more about how others are structured. We'll compile the results and share them with you so you have a go-to resource should your consortia consider modifying its governance structure. This way, you'll know right away which consortia to reach out to for guidance and lessons learned, instead of spending time tracking down that information on your own.
